JEL: 1-3 comma separated JEL codes

Abstract

Aim: Briefly describe the aim of your research.

Methodology: Briefly describe methodology of your research.

Results: Describe the outcome of your research.

Implications and recommendations: Describe the implications of your work and recommendations for future research.

Originality/value: Describe the originality and/or value of your research.

Keywords: 3-5 comma separated keywords

1. Introduction

In this section describe your reasoning for selecting the topic of your article and its importance. Indicate that there is a lack of research in this field and how your original research aims to improve it. Provide the aim of your article and any research questions or hypotheses you were working with. Briefly summarize the contents of your article.

2. Literature Review

2.1. Level 2 heading

Describe the results of currently available research and compare them with the aim of your article. You can also further develop any hypotheses or research questions you introduced in the previous section.

3. Methodology

In this section, provide an in-depth description of your research methodology. Describe your reasoning for selecting given methods. Indicate, whether your research is primarily qualitative or quantitative and state why you have chosen this approach.

Example unordered list (itemize). If a list entry begins with lower case character, then every line should end with a comma or a semicolon:

- first element,
- second element,
 - first element of a nested list,
 - second element of a nested list,
- third element.

Example ordered list (enumerate). If a list entry begins with an upper case character, then every should end with a period.

1. First element.
2. Second element.

This is an example paragraph with a footnote¹ and and APA style citation at the end. Suppose we want to find the minimum of following function (Aksin et al., 2006)

$$f(x) = |x| + 2|x - 1| + |x - 2| + |x - 4| + |x - 6| + 2|x - 10|, \quad x \in \mathbb{R}. \quad (1)$$

tabularray (*tblr* environment) is recommended for creating tables.

Table 1. Table title

¹ This is an example of a footnote.

Data	11.03.2019		
	11.03.2015–11.03.2018	11.03.2016–11.03.2018	11.03.2017–11.03.2018
Expected value of historical rates of return	-0.04%	-0.06%	-0.06%
Anderson-Darling test (p-value)	32.245 (<2.2e-16)	17.611 (<2.2e-16)	22.366 (<2.2e-16)
Historical drift	-0.04%	-0.07%	-0.07%
Simulation starting price (day 11.03.2018)	2 786.30	2786.57	2786.57
Actual value (day 11.03.2019; dotted line on histogram and solid line on box plots)	2 786.30	2786.57	2786.57

4. Discussion and Conclusion

In the final section of your article, present the conclusions of your research. Describe any generalizations, exceptions, or limitations you may have encountered during your work. Confront the results you got with the results of available research. Discuss the implications and recommendations for future research.

5. References
